# A-level PSYCHOLOGY

## Paper 1 Introductory topics in psychology

Monday 4 June 2018

Afternoon

Time allowed: 2 hours

### Materials

For this paper you may use:

- a calculator.

### Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions. You must answer the questions in the spaces provided. Do **not** write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

### Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 96.
- Questions should be answered in continuous prose. You will be assessed on your ability to:
  - use good English
  - organise information clearly
  - use specialist vocabulary where appropriate.

## Section A

### Social influence

Answer **all** questions in this section.

*Do not write  
outside the  
box*

**0 1**

Outline what is meant by 'agentic state' as an explanation for obedience.

**[2 marks]**

Jenny is a psychology teacher who works with six other teachers in the department. Jenny believes strongly that homework should not be graded as it distracts students from reading verbal feedback on their work. She would like her colleagues to stop grading work. The other members of the department do not agree but have told Jenny they are willing to have a meeting about it.

**0 2**

Using your knowledge of minority influence, explain how Jenny might be able to persuade the rest of the department to accept her view.

## Section B

### Memory

Answer **all** questions in this section.

Do not write  
outside the  
box

A researcher investigated the working memory model using a laboratory experiment. Forty students from a local college volunteered to take part.

In **Condition A**, 20 students performed the following two tasks at the same time:

- mentally counting backwards from 100
- tracking coloured shapes on a computer screen.

In **Condition B**, 20 different students performed the following two tasks at the same time:

- mentally counting backwards from 100
- reading a poem out loud.

The researcher predicted that the performance of students in **Condition A** would be better than the performance of students in **Condition B**.

0 4

Name the **two** components of working memory that would be involved in the performance of the tasks in **Condition A**.

[2 marks]

Mentally counting backwards from 100: \_\_\_\_\_

“I’m not sure”, replies the other mother. “I think there’s something about a mother’s love that makes it more special anyway – and so important for future development.”

**[16 marks]**

You may use this space to plan your answer.

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slight shadow on the right side, suggesting it's resting on a surface. There is no handwriting or other markings on the paper.

**Section D****Psychopathology**Answer **all** questions in this section.

For each question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

You may do your working in the blank space around each question but this will not be marked. Do **not** use additional sheets for this working.

A researcher studying depression wanted to see whether or not there was a relationship between level of self-esteem and negative schema score. She constructed two questionnaires and asked ten people who had been diagnosed with depression to complete them.

One questionnaire measured the participant's level of self-esteem. A low score (out of 50) indicated low self-esteem.

The other questionnaire measured whether the participant showed evidence of negative schema. A low score (out of 50) indicated evidence of negative schema. The two sets of results for each participant are shown in the table below.

**Table 1 Self-esteem score and negative schema score for each patient**

Participant	1	2	3	4	5	6	7	8	9	10
Self-esteem score	8	9	9	11	13	17	18	18	20	22
Negative schema score	11	15	13	18	12	14	20	16	17	19

**1 3**Is negative schema score best described as measuring a cognitive, emotional or behavioural characteristic of depression? Shade **one** box only.**A** Cognitive☐**B** Emotional☐**C** Behavioural☐**[1 mark]**

**1 4**

Draw a suitable graphical display to represent the data in **Table 1**. Label your graph appropriately.

**[4 marks]**

Title: \_\_\_\_\_

The researcher analysed the data in **Table 1** using a Spearman's rho statistical test.

**1 5**

With reference to level of measurement, explain why Spearman's rho is an appropriate statistical test for this data.

**[2 marks]**
